Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 56-87, 91, 94, 96, 100, 107, 108, drawn to remote control over telephone lines, classified in class 379, subclass 74.
 - II. Claims 88-90, 92, 93, 95, 97-99, 101-106, 109, 110, drawn to a control system with plural processors, classified in class 700, subclass 2.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention II (computer control system) does not require the particulars of the invention I. The subcombination has separate utility such as telephone calls and telephone dial tones or pulses.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2645

3. A telephone call was made to Oliver Gamble to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
